Colonel William E. Williamson
S.A.F.S.S.
Room 4C 1000
Pentagon, Virginia 20330

Dear Colonel Williamson:

In accordance with our conversation of September 30, enclosed for use in your photography acquisition cost analysis is a copy of the detailed specifications of the U.S.G.S. high altitude (40,000 ft.) aerial photography contract recently awarded to Mark Hurd Aerial Surveys, Inc.

To be consistent with the square mile costs indicated in the enclosed contract, the following statements are submitted as an update to the 1:250,000-scale revision study (TCS 863980-68) transmitted to you via our position paper dated August 6, 1968 (TCS 863983-68).

Revise as follows:

Article III A, paragraph 2 --

	<u>High Altitude</u>
* FY 69 (41 maps)	\$ 622,380
FY 70 (same)	1,275,120
FY 71 through 73 (same)	<u>2,732,400</u>
Revised Total	\$4,629,900

* The change in the number of maps programed for revision in FY 69 is due to slippage in the Special Projects Office building completion date.

Article III A, paragraph 3 -- the second and third factor should state \$2.30 and \$15,180, respectively.

Article IV, paragraph 2, 4th line -- "20%" should be changed to 13%.

Sincerely,

Winston Sibert

Winston Sibert
Chief, Special Projects Office
